

## Innovative Bauer geared motors on stand at EUROPACK EUROMANUT CFIA 2019

**Packing, handling and processing experts will have a chance to meet with Bauer Gear Motor at EUROPACK EUROMANUT CFIA in Lyon this November. A leading brand of the Altra Industrial Motion Corp., Bauer will display its range of geared motor solutions ideal for conveying and hygienic applications. Visitors will be able to meet with Bauer representatives and view products in Hall 7, Stand 557 during the event.**

*EUROPACK EUROMANUT CFIA takes place from 19th – 21st November 2019 at EUREXPO, Lyon, France. Bauer Gear Motor will be available in Hall 7, Stand 557 throughout the show.*

Taking centre stage on stand will be Bauer's innovative HiflexDRIVE, a range of permanent magnet synchronous motors (PMSM) with efficiency ratings up to IE5 for conveying applications. The range is geared towards hygienic sectors, with both aseptic coated and stainless-steel versions available. With ingress protection ratings ranging from IP67 to IP69K, the HiflexDRIVE can resist high pressure washdowns consummately, which is ideal for operators in the food and beverage industry. The design is fan-less, minimising the risks of contaminants being spread across processing areas.

Bauer will also be highlighting additional stainless-steel products at the show. Stainless-steel is particularly advantageous to end users in hygienic processing areas where risk of mechanical impact is high. Even in the eventuality of an impact, a stainless-steel motor will preserve its hygienic compliance, leaving no purchase for contaminants or corrosion to propagate - securing uptime.

As a leading global OEM, Bauer Gear Motor operates a network of highly-qualified engineers that can be dispatched from local centres to meet customer requirements. With a track record in geared motors from 1927, Bauer is a world leader in providing efficient solutions for the food & beverage, energy, wastewater, concrete, metals and material handling sectors.
