

## **New Midlands account manager appointed at Bürkert**

**Bürkert Fluid Control Systems has welcomed a new Account Manager for the Midlands region, with the appointment of Thomas Steele to the position. Thomas will be working directly with Bürkert customers, drawing on his innate experience and Bürkert's huge capability in process and measurement control to specify optimum solutions for end user applications.**

Thomas brings a great deal of experience to the Bürkert team. With expertise in specifying products for manufacturers of burners, boilers, furnaces and space heating – Thomas offers an extensive track record in the gas industry. Furthermore, experience as a sales manager for steam applications and general process valves ensures his background is in confluence with Bürkert's business as a whole.

"I hope that my knowledge of valves in industrial environments will help to expand the portfolio of Bürkert products in the Midlands," Thomas says. "Hopefully, we can break new ground for Bürkert by seizing market opportunities and expanding into new sectors, as well as building on the inherent success we currently enjoy in traditional markets as a first-choice project partner."

Neil Saunders, UK General Manager at Bürkert added: "It's exciting to welcome Thomas to our account management team. Prior experience is incredibly important in the demanding markets we serve and Thomas offers plenty of that. Our focus is always on providing a highly optimised solution to our customers, and Thomas' expertise will certainly help us to move forward in the Midlands."

## **About BURKERT**

Burkert Fluid Control Systems is one of the leading manufacturers of control and measuring systems for fluids and gases. The products have a wide variety of applications and are used by breweries and laboratories as well as in medical engineering and space technology. The company employs over 2,500 people and has a comprehensive network of branches in 36 countries world-wide.
