

SPS 2019 preview - Gaining a competitive edge with automation solutions

At SPS 2019 in Nuremberg, Mitsubishi Electric's motto will be 'Your solution partner for smart manufacturing'. On the stand the company will be demonstrating its latest range of automation products and technologies that give users a competitive advantage.

The solutions on show will include Predictive Maintenance, Time-Sensitive Networking (TSN) and increasingly collaborative robotics – all of which are designed to improve production. Help in handling big data using edge computing will feature prominently, in addition to the wider application of AI for improved machine and systems intelligence.

The realisation and application of these technologies will be aided through collaborations with partners of the e-F@ctory Alliance organisation. There will also be a focus on machine building, with several product developments offering improvements in performance and integration.

More information of specific products, themes and solutions will be released prior to and during the exhibition. Booth location: **Hall 7, stand 391**
