

Rotamec launches electrical contracting service

Rotamec is offering a new electrical contracting service as well as expanding its site services capabilities to include fully qualified industrial electricians. This new service will optimise project times and make work flows more efficient. The new service will be fully integrated with the existing mechanical engineering expertise, providing customers with an enhanced service that will streamline all electromechanical jobs in the future.

The new services include electrical design, 3-phase installation as well as inspection and test services to ensure compliance with 18th Edition IEEE regulations. All of the electricians working for Rotamec are experienced in industrial installations and they will offer services such a machinery installation and relocation as well as control panel design build and lighting installation.

Andy Newman, Operations Director at Rotamec comments: "The new electrical engineering section will really enhance the service we offer to customers. Our new electromechanical site services teams will provide a turnkey service for electric motors, drives and gearboxes, making projects more efficient. Our engineers will also be qualified for working in designated confined spaces and at height to ensure every application can be delivered safely.

"Going forward, we will be offering a greater range of services that will include lighting design, both standard and emergency, as well as periodic inspections of existing electrical installations. Working with our CAD design group, the electrical section will also offer design proposals and electrical verification drawings using market-leading software."

Rotamec's continued investment in its engineering team ensures customers continue to receive a 24/7 service with excellent response times and flexibility of service.

About Rotamec

Rotamec is a turnkey stock, supply, service and repair provider for a wide range of engineered products from leading brands. Operating UK facilities in Cheddar, South Wales, Exeter and Redditch, the business provides a 24/7, 365 days a year service to promote customer uptime by delivering cost effective engineering solutions.

Services offered include repair, refurbishment and rewind of AC and DC electric motors plus supply of motors, gearboxes, pumps, bearings and transmission components from leading brands. Site services are another area of expertise, with dedicated service teams on standby to supply and install all types of electrical and mechanical rotational equipment. Operatives undertake in-house training provided by leading industry manufacturers.

Rotamec was founded in May 2000, growing from a rewind and repair company to providing power transmission solutions in 2003. A fast, responsive service and access to nationwide stocks allows customers to control maintenance costs and ensure time efficiency.
