

UK SCADA specialist adds to technical support team

Products 4 Automation (P4A) has appointed Jamie Biggs as a dedicated Technical Support Engineer for the UK and Ireland. His role includes product training, specification advice and tech support for users of Movicon SCADA, HMI's and Industrial PCs.

With a strong IT infrastructure background, Jamie is well placed to assist with all the most recent challenges involved in industrial automation applications; such as setting-up web clients, servers, security, networking and communications with enterprise level platforms such as ERP and MES systems.

Natalie Turner, Sales Director at P4A adds, "It is the hands-on practical experience that allows Jamie to provide fast insightful technical advice that we really liked about him. The customer feedback from the training sessions he has already hosted has also been tremendous, so we are very happy to have him onboard."

"I like the team here at P4A a lot and the products are great too" adds Jamie, "Movicon in all its various forms provides a fantastic scope for making improvements to a whole host of applications, from HMIs to building controls and wider infrastructure projects. What is really exciting is that the software is constantly developing too, so the future will always be part of the present for us."

For more information or to talk to Jamie about your SCADA requirements, call the P4A office on (0) 121 630 2200.
